STAIN BLOCKER 5:1

CARPET PROTECTANT

Repels Oil and Water Based Stains

DESCRIPTION:

FOR CARPETS, DRAPERY AND UPHOLSTERY. STAIN BLOCKER is non-combustible, highly effective anti-soil and anti-static product for both natural and synthetic fibers. This water based fluorocarbon protection system containing carpet protectants retards staining and repels both liquid and oil as well as resists dry soils. This product is easy to apply and provides protection to carpet, draperies and upholstery. **Note: always test a small area for color fastness, dye stability and desired appearance before treating entire area.**

DIRECTIONS:

Shake well before using. Dilute 5 parts water to 1 part product. Product must be applied to clean carpet only. Product may be applied to damp carpet. For best results, use a pressure sprayer and apply with the nozzle 10-12 inches from the carpet. Use overlapping strokes at 1 gallon of product per 200 square feet. For cut pile, plush, or shag carpeting, re-apply in the opposite direction to assure complete coverage. Work product into pile immediately with a pile brush or an open shag rake. Allow to dry thoroughly. STAIN BLOCKER is also highly effective on draperies, upholstery, and all fabrics that test satisfactorily. These, too, must dry completely. Do not freeze: Product may separate and become UNUSABLE. Do not contaminate with alkaline detergents. Keep container tightly sealed.

PRECAUTIONARY STATEMENTS:

Wash hands, forearms and face thoroughly after handling. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical advice/attention if you feel unwell. If swallowed: Immediately call a POISON CENTER. Dispose of contents/container in accordance with local/regional/national/international regulations.

PHYSICAL PROPERTIES

APPEARANCE: Colorless liquid

Specific Gravity: 1.01

Odor: Characteristic

pH: 5.0-6.0

Solubility in water:: Complete

PACKAGING

Stocked in quarts and gallons.

Other sizes available.
